EDUCATION

B TECH CSE

YEAR 2022-2026

- BSA Crescent Institute Of Science And Technology,Vandalur, Tamil Nadu
- CGPA:8.14**

12 TH | Year 2022

COMPUTER SCIENCE

- Mcc Campus Matriculation Higher Secondary School,Tambaram,TamilNadu

SKILLS

- Programming Languages:** Python,C++
- Web Technologies:** HTML5,CSS3 •**Tools And Platforms:** Jupyter notebook,GitHub,vs code, android studio
- Machine Learning:** Supervised learning,Unsupervised Learning
- °**Communication,Leadership**

ACHIEVEMENTS

HACKATHONS:

CODECRAFT'25-THIRD PLACE.

HACKCRATE'26-THIRD PLACE

SIH HACKATHON 2025-PARTICIPANT CERTIFICATIONS:

MICROSOFT&LINKEDIN

- Carrer Essentials in Generative AI - 2024

NPTEL

- Python : Joy of Computing - 2023
- English language for competitive exams - 2025

CAREER OBJECTIVE

Enthusiastic student with a growing interest in artificial intelligence and machine learning and data science. Learning the basics of Python, data analysis, and machine learning algorithms. Curious about how smart systems work and excited to build simple AI projects. Eager to explore new technologies and develop skills to solve real-world problems in the future.

INTERNSHIP EXPERIENCE

AI/ML INTERN

INTERNEP

JUNE 2024-JULY 2024

- Explored basic machine learning algorithms such as linear regression, decision trees, and KNN using Python and Scikit-learn Worked on data preprocessing tasks like handling missing values, normalization, and feature selection to prepare datasets for modeling. Built simple ML models on real-world datasets to understand model training, evaluation, and performance metrics. Collaborated with a mentor to complete a mini project involving data analysis and prediction using Jupyter Notebook.

NEXILA TECHNOLOGIES

JUNE 2025-JULY 2025

- Built a predictive model using Simple Linear Regression to analyze the relationship between two key variables in a real-world dataset.
- Preprocessed data using Python, Pandas, and NumPy, including handling missing values, removing outliers, and normalizing input features.

PROJECTS

Real-Time Ambulance Coordination and Tracking System -

Designed a cloud-based system to automate ambulance dispatch using real-time GPS tracking. Implemented reduce emergency response time and improve coordination.

QUIZMASTER PRO-FULL STACK APPLICATION

•QuizMaster-Pro - A full-stack interactive quiz web application developed using Python (Flask). Features include multiple quiz categories, real-time score evaluation, user-friendly and responsive UI, and leaderboard functionality.

SMART RESUME CHECKER-AI

SMART-RESUME-CHECKER - AI-powered resume analysis web application built with Python (Flask) and a modern web tech stack. Users can upload resumes in multiple formats (PDF, DOCX, TXT) to receive ATS compatibility scoring, keyword and skills matching, domain-specific analysis, job recommendations, and downloadable professional reports.

AI Doctor Chatbot - Developed an AI-powered chatbot capable of understanding user medical queries and providing accurate, contextaware health guidance. Implemented natural language processing for intelligent responses and a user-friendly creation prepared using html css js flask
