SUMMARY

Enthusiastic and motivated Computer Science student with a strong interest in Artificial Intelligence, Machine Learning, Data Science, Python Development, and Full Stack Development. Proficient in Python, SQL, and machine learning fundamentals, with hands-on experience building AI-powered and web-based applications. Passionate about developing scalable software solutions, solving real-world problems, and continuously learning emerging technologies.

EXPERIENCE

AI/ML Intern

June 2024 – July 2024

InternPE

Explored machine learning algorithms including Linear Regression, Decision Trees, and KNN using Python and Scikit-learn. Performed data preprocessing, feature selection, and model evaluation while completing a prediction-based mini project using Jupyter Notebook.

AI/ML Intern

June 2025 – July 2025

Nexila Technologies

Developed a predictive model using Simple Linear Regression on a real-world dataset. Preprocessed data with Python, Pandas, and NumPy by handling missing values, removing outliers, and normalizing features for improved model performance.

Data Analyst Intern

June 2026

Vision Digital Solution

Analyzed digital marketing datasets to identify trends, evaluate campaign performance, and generate business insights. Prepared analytical reports and dashboards to support data-driven decision-making and improve campaign effectiveness.

SKILLS

Languages

Python, SQL, JavaScript

Web Technologies

HTML5, CSS3

Libraries

Pandas, NumPy, Scikit-learn

Databases

MySQL, MongoDB, Firebase

Tools

GitHub, VS Code, Jupyter Notebook, Android Studio

Soft Skills

Communication, Teamwork, Problem Solving, Data Analysis, Time Management

PROJECTS

Real-Time Ambulance Coordination and Tracking System

Developed a real-time ambulance coordination and tracking system using Flutter, Firebase, Google Maps API, GPS, and Firebase Cloud Messaging (FCM). Implemented live ambulance tracking, route optimization, emergency request management, and real-time notifications to improve communication between patients, ambulance drivers, and hospitals. Integrated cloud-based data storage and location services to ensure accurate updates and efficient dispatch, resulting in faster emergency response and improved coordination during critical situations.

QuizMaster Pro

<https://quizmaster-pro-m77y.onrender.com>

Developed a full-stack quiz application using Python (Flask), HTML, CSS, JavaScript, and SQLite. Implemented multiple quiz categories, real-time score evaluation, leaderboard functionality, and user authentication with a responsive interface. Designed the backend for efficient quiz management and automated score calculation, providing an engaging and interactive learning experience.

Smart Resume Checker

<https://smart-resume-checker-ls0r.onrender.com>

Built an AI-powered resume analysis web application using Python (Flask). Supports PDF, DOCX, and TXT uploads, provides ATS compatibility scores, keyword matching, skills analysis, and downloadable reports. Implemented an intuitive user interface with automated resume evaluation to help users improve their resumes for better job opportunities.

ACHIEVEMENTS

- **CodeCraft'25 Hackathon** – 3rd Place (6,000 Cash Prize)
- **HackCrate'26 Hackathon** – 3rd Place
- **Neurathon'26 Hackathon** – 2nd Place (8,000 Cash Prize)
- **Smart India Hackathon (SIH'26)** – Cleared First Round Screening

Certifications

- Microsoft & LinkedIn Career Essentials in Generative AI (2024)
- NPTEL – Python: Joy of Computing
- Sambhav Foundation – AI Productivity and Application

EDUCATION

B.Tech in Computer Science Engineering

B.S. Abdur Rahman Crescent Institute of Science and Technology

2022 – 2026

CGPA: 8.19/10
